# algaari<sup>™</sup>

Algaari products, made with found wood and mainly natural materials, are unique and at the same time one with the cosmos.

Pieces of furniture are all inspired by India's vast nature reserves, the last bastions of our precious flora and fauna. Therefore, each collection takes its narrative from the names of India's forests and wild life reserves.

Lamps, as givers of light, move away from our planet. The Sanskrit names for stars are used to signify each of Algaari's light, table and shelf combinations, usually using glass and/or fabric to bring focus to the whole.

Time is often measured in seasons and the Indian system of "Rashis" for Zodiac signs, are often matched with the progress of the year and of the changing climate. With that, a bit of fun as Algaari clocks are matched with Zodiac signs. Does the shape match your personality?
